SUBJECT: Establishing of Security Validation Temas

During the recent overseas trip and as a rebult of discoveries during the trip, and became requests from various field personnel in responsible positions, it is highly recommended that some type of security validation term service be furnished to various home and overseas operational units of this organization. Solve one listed some suggestions which might aid in the planning and establishing of such a service. These suggestions are by no moras intended to be final and complete plans but merely a basis around which a more detailed plan might be constructed.

CAPASILITY OF TRAILS:

Security validation terms would be trained to conduct skillful general interregation, Polygraph interregation, drug interregation, hypnotic interregation, and in some locations, the administering of operational hypnosis.

FURCATOR OF FERRIS

In the United States, the function of the security volidation terms would be 's follows: The ulbiants Folygreph screening of all CIA personnel; the proconsing of any loyalty cases which might arise from time to time; more detailed servining of special security entegories such as sersoning for Special Intelligent) information, Atomic Energy information, overseas departures, and any special cat jory having access to highly classified information. The overscas teams would conduct screening of certain entogories of overseas personnel; the procossing of various informents and foreign operational personnel being utilized; and any sensitive cases which might arise. These teems could also offer adequate cover for the use of operational hypnosis, and could offer its services to other aronetes and serve a four-fold surpose as follows: 1. To clear up some of the numerous cases which have been linjering for months and even years; 2. To give CIA personnel an opportunity to pick out the best informants and potential operational personnel from the subjects offergut those for screening; 3. Such a service would offer an opportunity to keep unofficially informed of the operational activities of other intelligence gathering agencies in the field; 4. Certain personrat on these towns could aid in the collection of information concurring interroetion becomigned and special operational procedure being utilized by Russia and Russian dominated countries.

LOCATION OF TEATS:

These teams hould be located both Stateshie and in various important oversens theatres. The creatural location of the Stateshie teams would include manington, 9. C. and possibly one or two other locations serving the central and vesters dutied States.

For the present, it would seem important that concentration be placed upon establishing and the successful operation of a term in Unahington, D. C. The moleus of this term already exists in the form of our present Polygraph screening program.

In conjunction with the establishing of overseas boms, the eventual location would depend upon the current world sibution. It would some desirable to establish the first team in a transfer to be utilized in conjunction with the great deal of cross presented our organization by the transfer transfer in the little of control to the control of the cont

THAM COMPLICABLE

Each town should have an interrogator qualified to do skillful dotailed and junctal interrogation, to conduct both drug and hypnetic interrogation. In areas measurable in the respection of a large master of antiplets, those functions could be divided many two or more non us the occasion descends. Posides those specialists, a medical man should be available for the estainistering of drugs, as should a clorical worker to facilitate the handling of pager work.

TEAM E WITHOUT:

Depositing upon the volume of subjects handled, each term would be equipped with our or sorre Polypropis, region tending, recording and confloring equipment, clariful equipment and supplies.

THAM THAIRING:

It would soom service to train all United States town personnel in Manhington and tion themely to then depending upon the area demand. Overses town personnel could receive preliminary training in Manhington and from there given oversess training in Manhington and from there given oversess training in Manhington are supported to the training, personnel could be sent to other races necessitating replacements.

COORDINATION AND RESPONSABILITY:

The coordination and responsibility of twens in both the United States and overseas is a problem which would require decisions at a level higher then this office. Such activities would reconstant the cooperation of Inspection and Security, Office of Schottfie Intelligence, Office of Special Operations and perhaps other branches to a limited extent.
